

Amaranth Soil Management Facility Environmental Assessment

Terms of Reference
Public Information Open House

Project Description

The proposed Project is to redesign, re-permit and re-engineer the Amaranth Landfill Site (Site) to receive up to 5,000,000 m³ of non-hazardous impacted soils for treatment and/or disposal. This Project will require preparation of an Environmental Assessment and an amendment to the current Certificate of Approval (C of A) to amend the Site's approved waste capacity, waste classification and service area.

The Amaranth Landfill has been in use for almost 34 years with minimal changes in its operation. By transferring the Site to Amaranth Landfill Management Facility Inc. the Township will benefit in many ways, such as:

- Site improvements using state-of-the-art engineering principles;
- Reduction of potential impacts on adjacent lands;
- Financial compensation to the Township; and
- Transfer of the closure and post-closure care responsibility from the Township to the Company.
